Your first design challenge, export PNG in Photoshop CS6

1. Cropping the canvas

• First hit Ctrl+S (CMD+S) on your keyboard to save the changes made to your document.

• Now press Ctrl+0 (CMD+0 on Mac) to view the whole canvas.

• Select the **Crop tool** (press C on the keyboard).

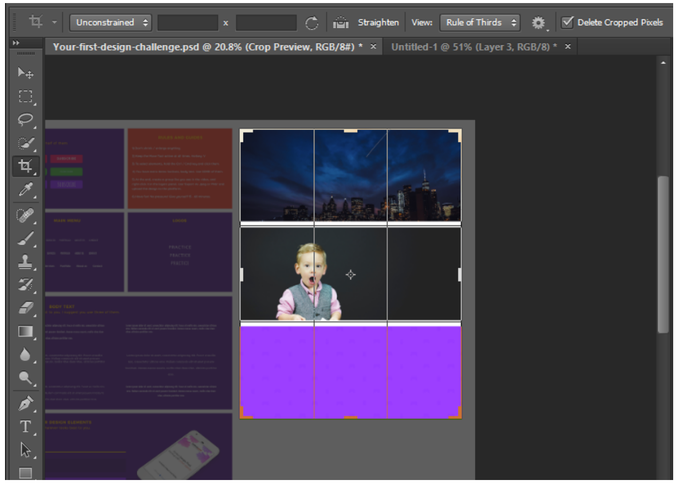
• A frame with handles will appear around your canvas.

• Grab the handles on the corners of your frame by clicking on them, then drag inwards.

• Adjust the area you're going to crop until all you have left are the designs.

• Press **Enter** to commit the changes

• If errors pop-up press space repeatedly until they go away.



2. Exporting the cropped PNG

• Press ALT+CTRL+SHIFT+S on your keyboard. This will bring up the **Save for web** dialog. In the top right select "PNG-24" as a preset and then hit "Save" in the lower right.
